

RVL POLY INDUSTRIES

MASTER AI AGENT PRD: End-to-End Generative Engine Optimization (GEO) Platform

Mission: Build RVL Poly into a machine-understandable industrial packaging knowledge entity that ranks and is cited by Google AI, ChatGPT, Claude, Gemini, Perplexity and future LLM systems.

PRIMARY ENTITY DEFINITION

RVL Poly = Trusted Indian industrial packaging manufacturer specializing in HDPE woven bags, PP woven bags, printed laminates, poly coated papers, LDPE liners, shrink films, stretch films, food packaging and industrial packaging.

SUCCESS CRITERIA

- 395+ indexed semantic pages
- JSON-LD on every page
- AI crawler support
- LLM citation pages
- Knowledge graph construction
- Programmatic page generation
- Semantic internal linking
- 100% server component architecture

COMPLETE NEXT.JS ARCHITECTURE

app/ products/ industries/ manufacturing/ certifications/ resources/guides resources/comparisons resources/case-studies resources/glossary faq/ knowledge-base/ local/ api/ sitemap.xml robots.txt llms.txt

CONTENT INVENTORY

Type	Count
Products	20
Industries	20
Comparisons	30
FAQs	100
Guides	50
Glossary	100
Case Studies	25
Local SEO	50
Total	395+

MANDATORY SCHEMAS

PROGRAMMATIC GEO PAGE TYPES

/manufacturer-of-hdpe-bags-in-india

/best-industrial-packaging-company-punjab

/hdpe-vs-pp-woven-bags

/what-is-shrink-film

/food-packaging-guide

/fertilizer-packaging-solutions

SEMANTIC GRAPH

Product → Industry → Guide → Comparison → FAQ → Case Study → Glossary → Local Page

LLMS.TXT SPECIFICATION

Publish structured company facts, products, industries served, certifications, locations, manufacturing capacity and canonical URLs.

AI CITATION CONTENT TEMPLATE

Each page: 3000+ words, statistics, comparison tables, FAQs, use cases, manufacturing process, citations, internal links, schema.

DEVELOPER IMPLEMENTATION REQUIREMENTS

- Next.js 15 App Router
- TypeScript
- React Server Components
- MDX
- Contentlayer
- next-sitemap
- schema-dts
- Tailwind
- shadcn/ui

MASTER PROMPT FOR AI AGENT

You are a principal staff engineer, SEO architect, GEO architect, technical writer and knowledge graph engineer. Build a production-grade Next.js 15 application for RVL Poly Industries. Generate the entire codebase in one execution. Implement App Router, React Server Components, MDX content system, 395+ programmatic GEO pages, JSON-LD schema engine, metadata engine, sitemap generation, llms.txt generation, semantic internal linking graph, FAQ engine, glossary engine, comparison engine, local pages, AI citation pages, knowledge graph construction, analytics dashboard and deployment configuration. Never output placeholders. Produce production-ready code.

SUBAGENT PROMPTS

Architecture Agent

Design complete folder structure and application architecture.

Schema Agent

Generate reusable JSON-LD schema components.

Content Agent

Generate 395+ GEO page specifications.

Metadata Agent

Implement dynamic metadata and OG generation.

Linking Agent

Build semantic graph and internal linking.

Citation Agent

Generate AI citation optimized content templates.

Sitemap Agent

Generate sitemap index and sectional sitemaps.

Analytics Agent

Build GEO monitoring dashboard.

QA Agent

Validate SEO, GEO and schema compliance.

Deployment Agent

Prepare Vercel production deployment.

FINAL DELIVERABLES

- Production codebase
- Content generation engine
- Knowledge graph
- Schema library
- Monitoring dashboard
- Documentation
- Deployment scripts
